SECURITY ON WHEELS
SMART MOBILE TRANSPORTATION
SOLUTION

 smart solution **2.0**

MOBILE

Safe public transportation is a worldwide concern, especially responding quickly to traffic accidents and guarding against potential terrorist attacks on transportation facilities. In addition, increased passenger loads and more complex transportation hubs call for a central management system to safeguard against unlawful activities such as pickpocketing, disorderly behavior, and so on.

Hikvision Smart Mobile Transportation Solution

Cameras

A variety of analog, HDTVI, and IP cameras acquire high-definition video footage of vehicle interiors as well as the surrounding environments.

Recorders

Embedded mobile NVRs & DVRs provide reliable onboard video recording. Multiple accessories are also supported to provide valuable features such as two-way audio, status indication, panic alarm.

Transmission

Communication between the platform and devices is mainly based on 3G / 4G wireless networks. Key data including GPS and alarm information is instantly uploaded to the platform for centralized control and management.

Management

The iVMS-5200 Professional video management platform manages the devices centrally and provides functions including live view, remote playback, GPS location, and route playback. Both the mobile client and PC client are supported.

■ Mobile HD Video Monitoring

Comprehensive high-definition video monitoring helps authorities to deal with situations such as pickpocketing, traffic accidents, terrorism, disorderly behavior of passengers and drivers, and more. Pictures and videos can be exported to law enforcement for investigation.

Supervising driver's behavior

Monitoring entrance with intrusion detection

Viewing vehicle passengers from different angles

Monitoring traffic outside of the vehicle

Dedicated fisheye camera and on-board recorder with LCD monitor offer side view to prevent dead-angle on backing a vehicle.

Rich Mobile-Dedicated Products to Satisfy Every Transport Requirement

Up to 1920x1080 resolution with mobile IP products

NETWORK

Special heating module and defog for outer-vehicle cameras

- High-reliability storage with die-cast aluminum design
 - Fully enclosed with dual-protected HDD and patented aviation airbag
 - Reinforced camera materials parts with silicone pad for shock absorption
 - Support multiple specialized connectors for vehicles or trail transport.
- * Customization may required.

HDTVI

Dual-card design and zero channel combine to optimize wireless transmission

ANALOG

- Wide range isolated power supply to adapt sudden power voltage change;
- Support low battery voltage detection;
- Using super capacitor to ensure normal shutdown;
- Overvoltage protection against shocks (pulse filtering)

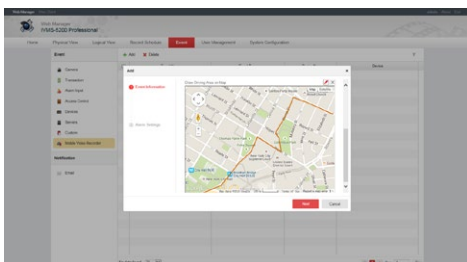

Real-time Tracking

Tracking in real time helps authorities inspect onboard situations.

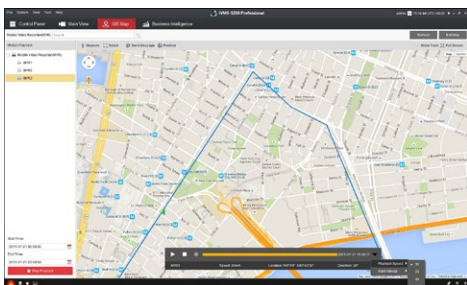

Exception Alarms

Smart features such as fence crossing alarms and deviation alarms can help authorities take effective action to handle security events.

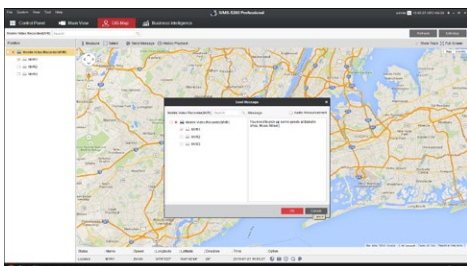

Routine Playback

This tool enables authorities to evaluate each vehicle's efficiency.

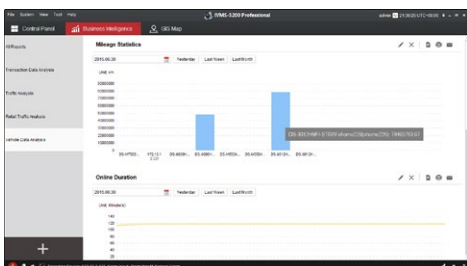

Instant Messaging

This function allows the security center to communicate directly with the vehicle.

Analytic Reporting

Reports on vehicle mileage, traffic, and timing provide intelligence that helps authorities make smart decisions to enhance revenue.

■ Remote Monitoring and Video Push Alerts from Anywhere

Traffic Accident

Video Push

Central Platform

A connection between the iVMS-5260 mobile client and the central platform allows real-time video from cellphone cameras to be sent to the central platform and then transmitted to more clients.

■ iVMS 5260: An Easy and Effective Mobile Client

Live View/Playback

- View real-time video from the cameras
- PTZ control
- Turn on / off the audio in live view
- Manual recording
- Search by date / storage mode

Alarm Notification

- Receive and display alarm notifications
- View the alarm-related live video or recording

Video Push

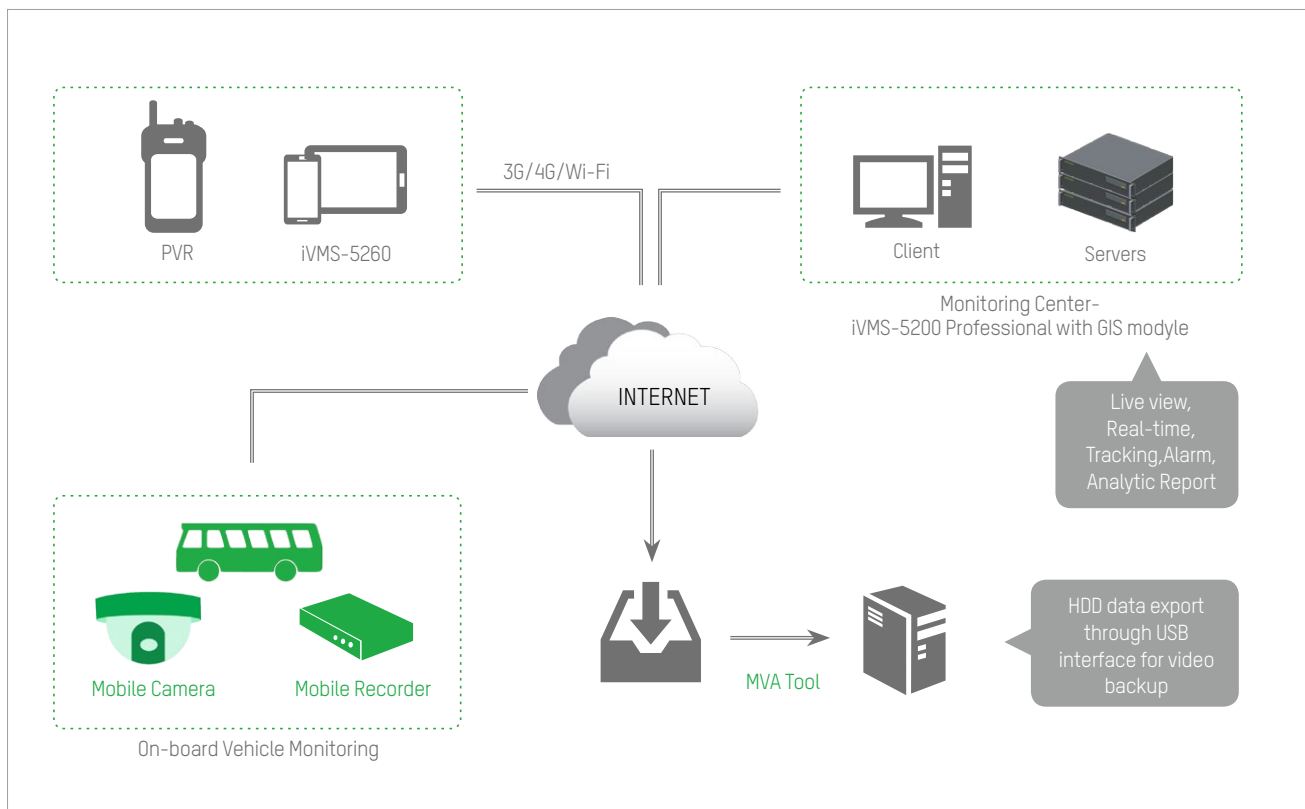

- Video push from your smart phone to control client
- Instant video sharing with other users

iOS/Android Support

- iOS 6 / iPhone 4S, iPad 2, or later
- Android 2.3.3 / CPU@1GHz, Memory@1GB, or above

A HANDHELD SURVEILLANCE SYSTEM TO HANDLE TOUGH JOBS

Developed specifically for mobile handheld surveillance applications, Hikvision's new Portable Video Recorder (PVR) offers superior video performance and is exceptionally versatile and robust, making it suitable for practically any surveillance job and any environment. The PVR offers ideal support in situations requiring constant communication and control to ensure users' safety even under the most dangerous conditions — cutting-edge technology in a portable package that handles both daily surveillance needs and emergency situations.

APPLICATION REFERENCE

■ Dubai-Sharjah-Ajman’s National Charity School Project, UAE

100 school buses for the Dubai-Sharjah-Ajman’s National Charity School are equipped with Hikvision CCTV cameras, DVRs, driver LCD screens. This convenient solution ensures the protection of all pupils and works perfectly in harsh and challenging environments that may include vibration, dust, changing temperatures – and children, as noted by customers!

■ Bangkok’s Police Force Project, Thailand

Hikvision’s mobile security solution helps Bangkok’s police force stay ahead of the curve. Hikvision’s Portable Video Recorder and Mobile DVR have been placed in squad cars and motorcycle units to achieve a wide array of security benefits for the Thai police force and the larger communities in which they serve.

■ Ningbo City Bus Mobile Surveillance Project, China

This installation includes more than 3,600 buses belonging to 14 transportation companies in Ningbo. The Hikvision mobile surveillance solution helps customers solve security problems on their cars, protect their assets, and safeguard passengers and drivers. It can also provide video evidence to security officials for investigation purposes.

■ Frankfurt’s Light-Rail Stations, Germany

Hikvision megapixel mini dome cameras were installed within support columns as well as next to the emergency button. This action immediately triggers the camera and sends the image in real-time to the control center, thereby alerting security personnel about the situation.

■ Supervia Stations Surveillance System, Brazil

Hikvision megapixel dome cameras were installed on train corridor ceilings to provide a clear and vivid view of the thousands of passengers who use this station. The compact design of this camera results in a less visible presence, thereby reducing the possibility of vandalism – either accidental or intentional.
